Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

1. The numbering of claims is not in accordance with 37 CFR 1.126 which requires the original numbering of the claims to be preserved throughout the prosecution. When claims are canceled, the remaining claims must not be renumbered. When new claims are presented, they must be numbered consecutively beginning with the number next following the highest numbered claims previously presented (whether entered or not). Misnumbered claim (repeated claim 5) been renumbered 6.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

3. Claims 1-2, and 6 are rejected under 35 U.S.C. 102(e) as being anticipated by Gannoe et al. 2004/0082963. Gannoe et al. discloses the invention as currently claimed noting figures 5E-6D comprising: An apparatus for achieving weight loss in a patient comprising an artificial stoma device (TR, ST) sized and configured to be

Art Unit: 3738

installed in a stomach of a patient and a gastrointestinal sleeve (113) connected to the artificial stoma device, the gastrointestinal sleeve sized and configured to extend from the artificial stoma device through the stomach and into the intestines of the patient.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 3-4 and 6 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gannoe et al. in view of Crabb. Gannoe et al. has been disclosed above however Gannoe et al. does not specify the stoma ring is adjustable or self- adjustable. Crabb teaches a device for controlling obesity with adjustable rings (32, 34 see col. 4, lines 35-48 wherein collapsible equates to adjustable and wherein the ring deforms and returns to its original shape.) and a sleeve attached to the rings (20). It would have been obvious to one having ordinary skill in the art at the time the invention was made to take the invention of Gannoe et al. and utilize the adjustable/collapsible rings as taught by Crabb because both inventions provide a regulation of food for the treatment of obesity and is merely a change in positioning and sizing of the device as the structure are the same.

Allowable Subject Matter

6. Claim 5 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Woo 2004/0133147; Deem et al. 2003/0109892; and Sangouad et al. 6,409,656 show related material.
